LiDAR Revised Maps of Selected Lower
Peninsula Counties, Second Edition

by James S. Hannum, M.D.

Introduction

In the Pines-Part IV, An Atlas of Michigan Logging Railroads is the last in the series of volumes which present maps of Michigan's abandoned logging railroads. Between the publication of volumes II and III, high resolution LiDAR (Light Detection and Ranging) imagery was made available by the United States Geological Survey for most (and by 2024, all) Michigan Counties. This technology maps ground contours with lasers; the data obtained is free of the distortion due to tree foliage, which often is

present in aerial photographs. Volume IV contains revised maps of all the Lower Peninsula counties covered in the original book, as well as in Part II. The LiDAR image on the front cover of Part IV comes from Henry, in Manistee County. There, the grades of three different abandoned railroads cross. Facing the title page is an image of the area around Olga Lake, in the northeast corner of Lake County. Updated maps of both counties appear in Part IV.

Revised Maps

High resolution LiDAR imagery has become a useful tool in the process of mapping long abandoned railroad grades. In February 2019, the United States Geological Survey website added several new layers derived from projects using LiDAR technology. These data, now available for all Michigan counties, is located at <https://apps.nationalmap.gov/viewer/>. In the layer list, on the tool bar, the layer I have found most helpful is designated: "3DEP Elevation – Hillshade Stretched."

This book contains high-resolution, LiDAR-revised maps of Alcona, Alpena, Antrim, Arenac, Bay, Benzie, Charlevoix, Cheboygan, Clare, Crawford, Emmet, Gladwin, Grand Traverse, Iosco, Isabella, Kalkaska, Lake, Leelanau, Manistee, Mason, Mecosta, Midland, Missaukee, Montcalm, Montmorency, Muskegon, Newaygo, Oceana, Ogemaw, Osceola, Otsego, Presque Isle, Roscommon, and Wexford Counties.

Midland County - Tittabawassee & Hope Railroad; Hill Log Road.

Missaukee County – Richard G. Peters railroad (removed from Section 18, Township 22 North, Range 8 West. It is likely that the statement in Michigan's Logging Railroad Era, 1850-1963, A Selected and Annotated Bibliography, that this line connected to “the Lake City Branch,” implies an interchange with the Lake City Branch of the Cadillac & Northeastern Railroad. Thus, an exact position of that Peters grade remains undetermined. On the other hand, a newly discovered Peters railroad, in Bloomfield Township, has been located); Haring & Long Lake Railroad (it appears to have travelled along the south side of Round Lake, rather than north of that lake); two undetermined railroad grades in the southeast part of the county (linked to the T. D. Stimson Railroad);

a Grand Rapids & Indiana Railroad branch (northeast of Jennings); the Vogel Tramroad; Watson Brothers Railroad; Hovey & McCracken railroad; Simeon Babcock & Company Railroad (removed); Blodgett Railroad. All Railroads which appeared on this map have been revised, except the Ann Arbor Railroad, and the undetermined grade in Section 34, Township 21 North, Range 6 West. Two new undetermined RRs are added in T24N R7W. Grades north of Mooresville are now attributed to West Branch & Moorestown RR. The Crawford & Manistee River RR did not reach Mooresville. Grades near Stittsville were added. More grades now attributed to Thayer Railroad. The Crawford & Manistee River RR grade to Pioneer is removed. Watson Brothers RR is now accurate.
